Testcase 1001:

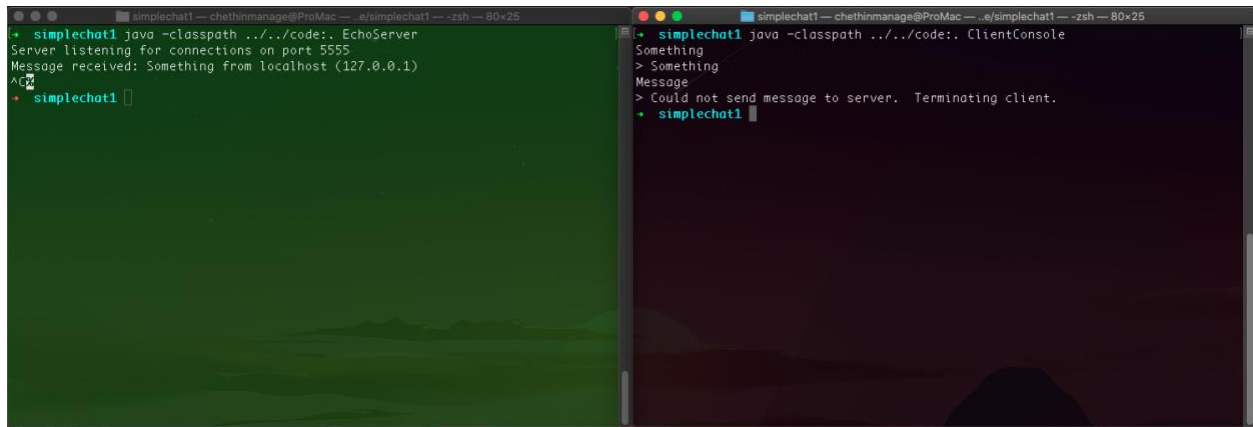

```
simplechat1 — java -classpath ../../code:. EchoServer — java — java -classpath ../../code:. EchoServer — 80...
[→ simplechat1 java -classpath ../../code:. EchoServer
Server listening for connections on port 5555
```

Testcase 1002:

```
simplechat1 — chethinmanage@ProMac — ..e/simplechat1 — -zsh — 80×24
[→ simplechat1 java -classpath ../../code:. ClientConsole
Error: Can't setup connection! Terminating client.
→ simplechat1
```
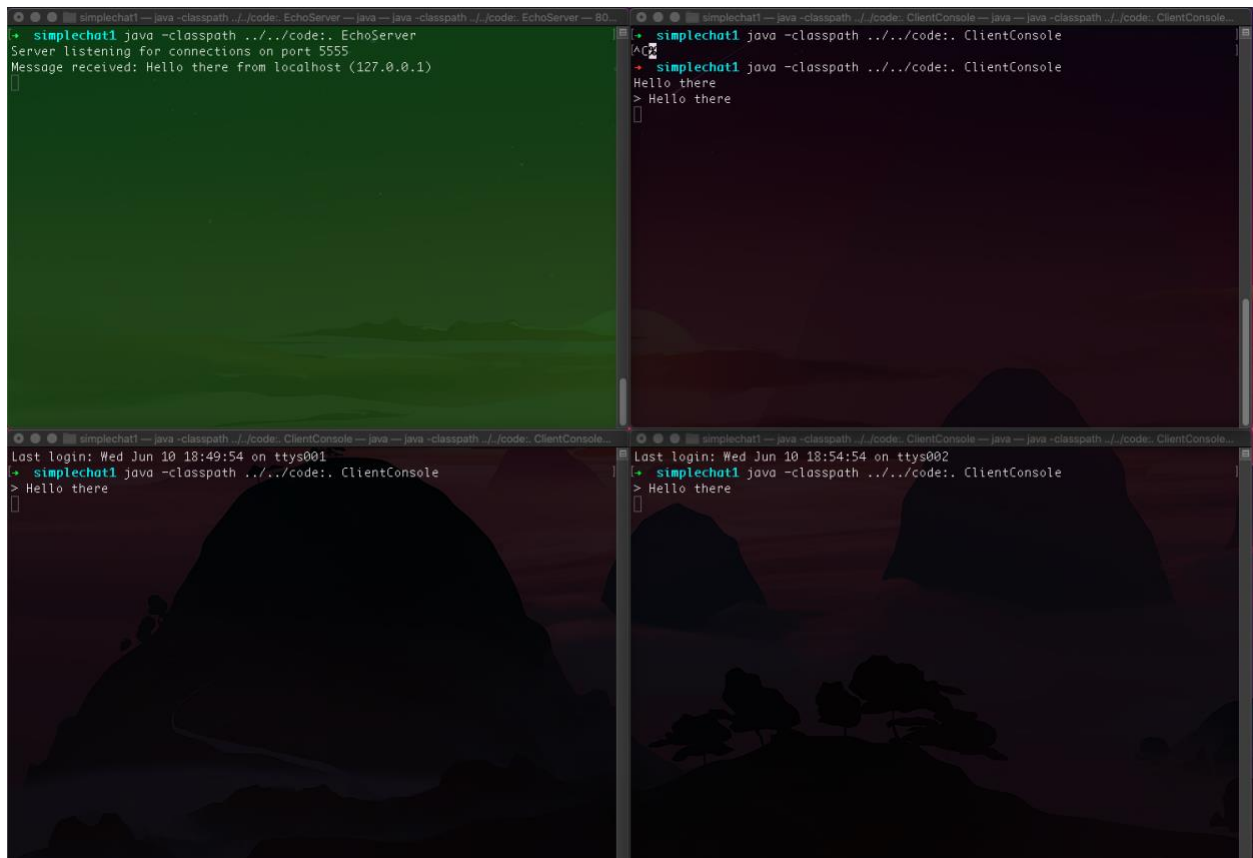

Testcase 1003 & 1004 & 1005:

```
→ simplechat1 java -classpath ../../code:. EchoServer
Server listening for connections on port 5555
Message received: Something from localhost (127.0.0.1)
^C
→ simplechat1 □
```

```
→ simplechat1 java -classpath ../../code:. ClientConsole
Something
> Something
Message
> Could not send message to server.  Terminating client.
→ simplechat1 □
```

Testcase 1006 & 1007:

```
→ simplechat1 java -classpath ../../code:. EchoServer
Server listening for connections on port 5555
Message received: Hello there from localhost (127.0.0.1)
□
```

```
→ simplechat1 java -classpath ../../code:. ClientConsole
^C
→ simplechat1 java -classpath ../../code:. ClientConsole
Hello there
> Hello there
□
```

```
Last login: Wed Jun 10 18:49:54 on ttys001
→ simplechat1 java -classpath ../../code:. ClientConsole
> Hello there
□
```

```
Last login: Wed Jun 10 18:54:54 on ttys002
→ simplechat1 java -classpath ../../code:. ClientConsole
> Hello there
□
```

Testcase 1008, 1009, 1010, 1011 & 1012:
*Skipped since I only have 1 computer (As instructed in teams chat "

[12:38 PM June 10th] Timothy Lethbridge
Yes, you would need another computer. And as I have said a few times in this chat, during the pandemic you won't have one, so you are allowed to skip that test if needed
"

Testcase 1013:

Testcase 1014, 1015 & 1016:
* Skipped since I only have 1 computer (As instructed in teams chat "
